Top shelves are shipped upside-down.

Important information to know about glass shelves and covers:

Do not clean glass shelves or covers with warm water when they are cold. Shelves and covers may break if exposed to sudden temperature changes or impact, such as bumping. For your protection, tempered glass is designed to shatter into many small, pebble-size pieces. This is normal. Glass shelves and covers are heavy. Use special care when removing them to avoid impact from dropping.

Place shelves right side up by completing the following:

1. Hold shelf firmly in place by positioning hand underneath shelf.
2. Remove Packaging material from shelf area.
3. Remove shelf by lowering front and releasing hooks from metal track. Pull shelf forward.
4. Flip shelf over.
5. Replace shelf by lifting front of shelf slightly. Insert hooks into metal track and lower front.

Le réfrigérateur est livré avec les tablettes supérieures à l'envers..

Importants renseignements à savoir au sujet des tablettes et des couvercles en verre :

Ne pas nettoyer les tablettes ou couvercles en verre avec de l'eau tiède quand ils sont froids. Les tablettes et les couvercles peuvent se briser s'ils sont exposés à des changements soudains de température ou à un impact tel que coup brusque. Pour votre protection, le verre trempé est conçu pour éclater en d'innombrables pièces minuscules. Ceci est normal. Les tablettes et les couvercles en verre sont lourds. Un soin spécial s'impose lors de leur déplacement pour éviter l'impact d'une chute.

Pour remettre les tablettes à l'endriot:

1. Maintenir la tablette fermement en place en plaçant la main dessous pour la soutenir.
2. Enlever tout matériau d'emballage de la tablette et de sa proximité.
3. Enlever la tablette en abaissant l'avant de façon à décrocher les crochets de la crémaillère métallique. Tirer la tablette vers l'avant.
4. Retourner la tablette à l'endriot.
5. Remettre la tablette en place. Pour cela, soulever légèrement l'avant, insérer les crochets dans la crémaillère et abaisser l'avant.
